Projects

- **Braille to Speech System — 2024**
Built a machine learning + image processing system for real-time Braille character recognition and speech output, integrated with LabVIEW for processing and TTS generation.
- **Forex Price Prediction Platform — 2024**
Developed an LSTM-based Forex forecasting platform using 10+ years of market data. Deployed models on AWS SageMaker with a React + Tailwind dashboard and risk metrics (Sharpe & Sortino).
- **NSFW Content Detection System — 2024**
Designed a real-time NSFW detection pipeline using Python, ONNX, and OpenCV, enabling frame-level classification and automated sensitive-content blurring in images and videos.
- **Privacy-Preserving Recommender System — 2025**
Built an e-commerce recommendation system using Federated Learning and Differential Privacy to generate personalized recommendations while protecting user data.
- **Review Analysis & Summarization System — 2025**
Developed a Flask-based AI application for Walmart reviews featuring web scraping, fake review detection (91.3% accuracy), sentiment analysis, and aspect-based summarization with a visualization dashboard.
- **Serverless Audio Intelligence Platform — 2026**
Built a Dockerized AWS Lambda audio analytics pipeline using Python and Librosa to extract acoustic features and perform sentiment analysis on customer calls via a serverless API.

Work Experience

- **Kotak Mahindra Prime Ltd. — AI Intern (Support Division)**
Nov 2025 – Present

Certificates

- Deep Learning A-Z 2025: Neural Networks, AI & ChatGPT Prize
- Python for Data Science and Machine Learning Bootcamp
