

Education

MPSTME, NMIMS University	2022 - 2026
B. Tech in Data Science	
CGPA: 3/4	
Queen's Mary	2020 - 2022
HSC: 66.3%	
RBK School	2020
ICSE: 90%	

Projects

- **AMERICAN SIGN LANGUAGE DETECTION-2024**
Developed a neural network model to recognize American Sign Language (ASL) gestures using a labeled dataset.
Trained a CNN with preprocessed and augmented data for gesture classification
Integrated the model with OpenCV for real-time gesture detection and created a user-friendly interface.
- **BRAILLE TO SPEECH-2024**
Developed a Braille-to-speech conversion system using machine learning and image processing for real-time Braille character recognition. Integrated the model with LabVIEW for processing and text-to-speech conversion, featuring an intuitive, user-friendly interface for seamless interaction.
- **FOREX PRIVE PREDICTION PLATFORM-2024**
Built an AI-driven Forex analytics platform using LSTM networks on 10+ years of data for multi-currency prediction, arbitrage detection, and portfolio optimization. Integrated risk-return analysis with Sharpe and Sortino ratios, and delivered interactive dashboards with a modern React.js and Tailwind CSS UI.
- **NSFW CONTENT DETECTION SYSTEM -2024**
Designed a real-time NSFW video detection system in Python using an ONNX model and OpenCV. Integrated NudeDetector for frame-wise classification and VideoProcessor for selective blurring. Implemented configurable rules to blur sensitive regions in both images and videos.
- **PRIVACY-PRESERVING RECOMMENDER SYSTEM -2025**
Built an e-commerce recommender using Federated Learning and Differential Privacy, enabling personalized suggestions without exposing sensitive user data.
- **CRICKET MATCH PREDICTOR – 2025**
Built an ML-powered cricket analytics platform using ball-by-ball JSON data from historical matches for win probability prediction, player performance insights, and venue trend analysis. Leveraged scikit-learn and XGBoost for feature engineering and model training, integrated Supabase for backend data management, and delivered player filters, head-to-head comparisons, and venue statistics through an interactive dashboard

Technical Skills

- **Languages:** python ,R ,SQL ,HTML5 ,CSS ,javascript ,matlab ,java ,c++ ,lab-view
- **Software:** labview ,Microsoft excel , tableau , Jupiter notebook ,VS code ,RStudio ,Oracle Database ,MongoDB ,MySQL ,Workbench ,docker ,AWS ,Autocad ,ArcGIS
- **Frameworks and Libraries:** Numpy, Pandas, Selenium, Sci-kit Learn,TensorFlow, Keras , OpenCV , Streamlit , Matplotlib, Seaborn, React.js, Django, Tailwind, Bootstrap

Soft Skills

- **Problem-Solving & Analytical Thinking:** Essential for debugging, optimizing, and data interpretation.
- **Adaptability & Continuous Learning:** Crucial given your diverse tech stack and the fast-paced industry.
- **Communication & Collaboration:** Vital for teamwork, documentation, and presenting technical insights.
- **Time Management & Organization:** Key for balancing projects and learning new tools efficiently.

Achievements and Positions of Responsibility

- Volunteered at Uddan the Inspiration welfare foundation as field staff
- Chess u17 DSO winner
- Relay 4*100m DSO winner
- Basketball DSO winner
